Dreer's Famous American Asters

Dreer's Superb Late Branching Asters

The finest Asters for late August and September blooming.

The plants form strong, branching bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome Chrysanthemum-like flowers, which, under ordinary cultivation, average 5 inches across. The form of the flowers, together with the length of the stems, places them at the head of Asters for cutting. They come into bloom from two to three weeks after the average type, usually being at their best during September, and filling in the gap between the general run of Asters and Chrysanthemums. We offer eight beautiful and distinct colors, viz:

Dreer's "Peerless Pink" Aster

This grand Aster may be briefly described as a glorified late branching shell-pink or Mary Semple. It has the same strong, sturdy habit of growth; comes into bloom a little earlier; bears freely almost globular flowers, rarely under 4 inches across and frequently over 5 inches. The color is rich shell pink, similar in shade but more decided than the late branching. The centre petals are prettily incurved, while the wide outer petals reflex, making a most artistic and finely finished flower, and stands cut longer than any other. 40 cts. per trade pkt.; \$2.00 per doz.

Dreer's "Pink Beauty" Aster

A magnificent cut-flower variety, in bloom from early August until well on in September; 24 to 30 inches high; flowers average 4 inches across, on long strong stems. Color a delicate blush pink, the finest pink midseason sort. 30 cts. per trade pkt.; \$1.50 per oz.

Red Aster "Sensation"

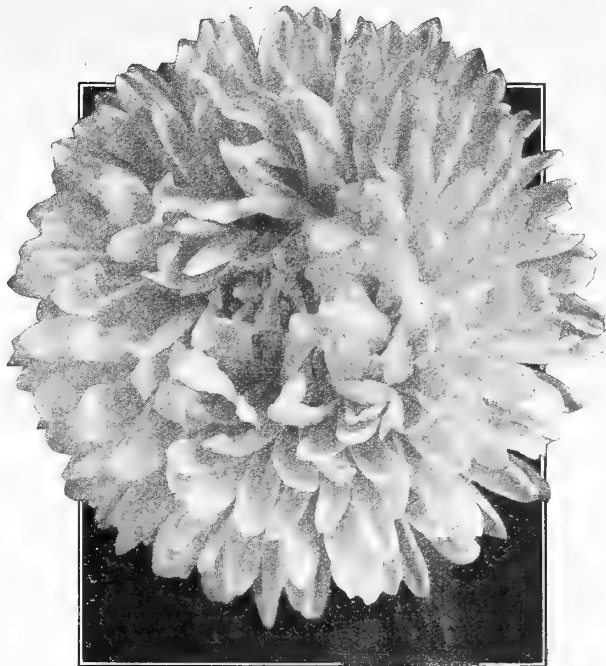

This is the reddest of all Red Asters, the color being a rich garnet or ox blood red which glistens in the sunshine like a live coal. The plants are of free-branching habit, about 18 inches high; the very double flowers, averaging 3½ inches across, are borne freely on stems a foot long from early in August until the close of September. The intense color shows up well when cut, and makes a very brilliant bit of color in a bed or border. 40 cts. per trade pkt.; \$2.00 per oz.

DREER'S SELECT DAHLIAS

We have greatly extended our cultures of Dahlias and offer not only the well known standard sorts, but also an exceptionally fine list of novelties, of American and European origin, among them a number which are offered exclusively by us this season, all of which will be supplied in dormant field roots or in strong divisions of proper planting size excepting the varieties listed under the headings of "Varieties of Recent Introduction and of Special Merit" and "Dreer's Riverton Decorative Dahlias" listed on pages 29 to 32, these will be supplied only in strong growing or green plants from three-inch pots which will be ready for delivery after May 15th.

Dahlias of Recent Introduction and Varieties of Special Merit

The varieties here offered consist of new American and foreign introductions, also including a few older sorts which are still scarce and which rank in quality with some of the best of recent introduction.

Amigo (Decorative). Of large size, and of marvelous coloring; a bright gold, illuminated with a sunset glow, the petals being deeply cleft adds greatly to its attractiveness. Plants, \$1.00 each; \$10.00 per doz.

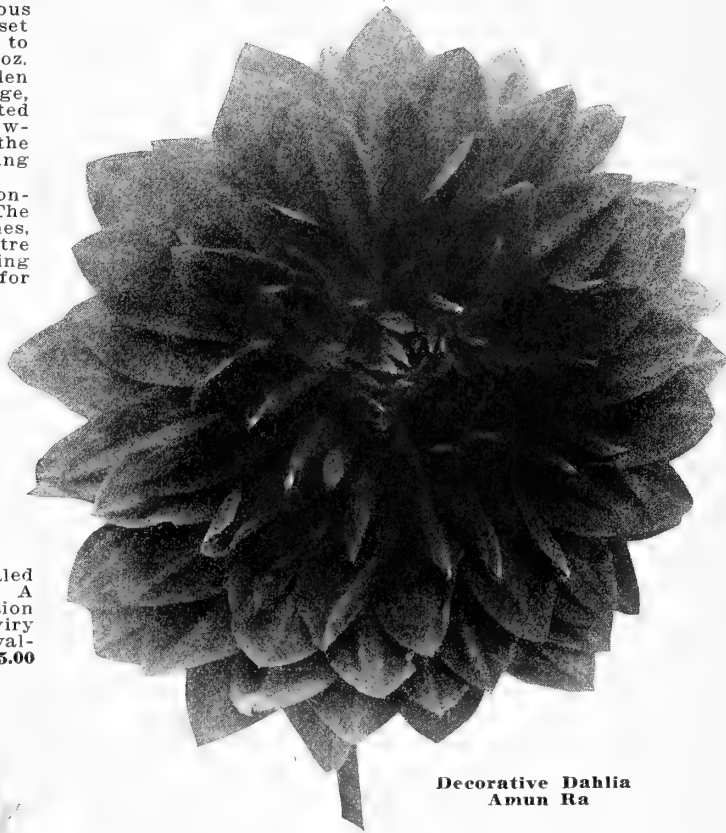

Amulet (Decorative). Light jasper-red with golden salmon suffusion, like richly-tinted autumn foliage, a most desirable addition to the autumn tinted types. The flowers are of large size, very free-flowing, holding their full centre to the end of the season and as a cut flower, one of the best keeping sorts. Plants, \$2.00 each; \$20.00 per doz.

Amun Ra or The Sun God (Giant Decorative). Wonderfully distinct both in color and formation. The outer petals of gorgeous copper and orange tones, shading to gold and amber, deepening in the centre to a dark reddish brown, the effect as a whole being that of a gorgeous sunset. The flowers keep for days when cut and last a wonderfully long time on the plant. Plants, 50 cts. each; \$5.00 per doz.; \$40.00 per 100.

Attraction (Cactus). A beautiful Dahlia. The flowers measure fully 6 inches in diameter, are composed of gracefully arranged, curled or twisted petals of a lively, yet soft silvery mauve-rose, with white suffusion. Plants, 25 cts. each; \$2.50 per doz.; \$18.00 per 100.

Ambassador (Cactus). Awarded in 1921 the first prize at the San Francisco show for the best and most artistic variety exhibited. Its color is a soft yellow at the centre, with salmon-amber and pink shadings, gradually deepening towards the tips. The flowers are of largest size and set just right on perfect stems. Plants, \$1.00 each; \$7.50 per doz.

Andreas Hofer (Cactus). A lovely narrow-petaled cactus of ideal form and soft, tender coloring. A most delicate shade of pink with salmon suffusion passing to a creamy-white centre. Its stiff wiry long stems and free habit of bloom make it invaluable for cut flowers. Plants, \$1.50 each; \$15.00 per doz.

A Real Novelty in Shrubs

New Red-leaved Japanese Barberry

(*Berberis Thunbergi Atropurpurea*)

It is only once in a lifetime that a really worth while outstanding novelty in hardy shrubs is introduced and in this new Barberry we have such a plant.

It is similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubby border, as single specimens, or for planting in clumps on the lawn, as well as for foundation plantings and for hedges, but the foliage of this new variety is of rich, lustrous, bronzy red, becoming more brilliant and gorgeous throughout the summer and in the fall changes to vivid orange, scarlet and red shades. In this coloring it is unequalled by any other shrub and is followed by the same brilliant scarlet berries common to the type which remain on the plant the entire winter.

In order to develop its brilliant coloring at all seasons it must be planted in full exposure to the sun.

New Red-Leaved Japanese Barberry

Tuberous-Rooted Begonias

We are pleased to be in a position to offer these in a strain of American-grown tubers which for quality of flowers will compare favorably with the strain which our customers were accustomed to receive from us previous to the embargo on plant and bulb imports, when we were handling the product of European specialists.

Frilled Tuberous-Rooted Begonias

If you have only been growing the ordinary plain-edged Begonias, you will be delighted if you will give this wonderfully improved strain a trial. The flowers are not only of giant size, but the petals are beautifully frilled and waved, not unlike the finest frilled or ruffled Petunias. We offer choicest mixed colors. \$2.00 per doz.; \$15.00 per 100; \$130.00 per 1000.

Bougainvillea

Crimson Lake. Introduced through the Bureau of Plant Industry of the Department of Agriculture.

The flowers are like all other Bougainvilleas, perhaps a trifle larger, but in coloring none compare with it in richness and brilliancy. On first opening a brilliant crimson-lake, retaining this color for three of four weeks, after which they gradually pass to a crimson-carminé.

In southern California and Florida, the Bougainvilleas make gorgeous climbers for outdoor planting, while in the north they are useful subjects as pot plants for the conservatory or greenhouse.

It naturally makes a bushy, well-shaped plant either in a four- or six-inch pot and splendid specimens can be grown in 8- or 10- or 12-inch tubs, its large, bold, more or less curled and wavy foliage, together with its glaucous blue color gives it a distinction not possessed by any other decorative plant.

Being of rapid growth, it is a profitable plant to grow. As a house plant it gives general satisfaction; in this it is unequaled by any other fern, not even excepting the popular Holly Fern.

DREER'S SELECT ROSES

Strong Two-Year Old Stock for Your Retail Trade

The Roses here offered are all field-grown plants; the greater part of them have been specially grown for us by Howard & Smith at their San Fernando Nursery, California, and the plants are equal to the best Roses produced anywhere in the Rose-growing world today.

These plants are all potted during December and January, stored in cold houses and cold frames, so that they break away naturally in spring, making this the best possible stock for selling to the retail customer.

The prices noted are for strong plants in 5- and 6-inch pots (according to the growth of the variety), for delivery during April, May and June, and while we will make shipments earlier if requested, we prefer to book orders for those months only.

New Hybrid Tea Roses

Introductions from Various Specialists

Angele Pernet. Entirely distinct and novel in color, described by the raiser as a vivid orange-yellow shaded fiery deep reddish-apricot, but "tango color" we believe describes it better. It is a good grower, producing a long bud opening to a moderately full, beautiful, sweet-scented flower that at once attracts attention. Awarded Gold Medal at the Bagatelle Paris trials in 1924. \$1.00 each.

Bedford Crimson. (Laxton Bros.) This grand Rose was awarded the Clay Challenge Cup by the Royal Horticultural Society of England for the best new Rose with the best Old Rose Scent. Aside of its delightful odor, it is unquestionably the most beautiful high-colored Rose yet introduced, a brilliant crimson-scarlet. It is of perfect form both in the half-developed as well as in the fully expanded bloom, being full double with an average of forty heavy, substantial petals which reflex beautifully; its flowers are produced profusely on good, stiff stems. It has not been as strong and vigorous a grower under our trials as it is with the originators, in which we, however, believe it will improve, this being frequently the case with European introductions. \$2.50 each.

Cuba. A 1927 introduction of Pernet-Ducher. As a bedding Rose for brilliant mass effect we know of nothing that will equal this French introduction, and although the large flowers are almost single, having but two rows of petals, they possess a charm and brilliancy in color which is an entirely new shade in Roses, a glorious bright vermillion-scarlet overlying an orange ground. This color combination is so intense that in full sunlight it glistens with an iridescent sparkle. A vigorous grower with dark green foliage which makes a splendid foil for the masses of richly colored blooms, which it produces from spring to late fall. Strong two-year-old plants, \$1.50 each.

Emile Charles. A French introduction of rich coloring, the buds being of a fiery-red shaded and suffused with golden yellow. These develop to medium-sized flowers of superb coral-red, shading to rosy strawberry-red on the outer petals. Growth vigorous and free-flowering. \$1.25 each.

Frank Reader. A new Holland introduction raised by Messrs. Verschuren & Sons, the raisers of the pretty yellow Rose, Souvenir de H. A. Verschuren, as well as other meritorious varieties.

Frank Reader, in our California trials during the past two seasons, has attracted great attention, and at the 1926 summer show of the Royal Horticultural Society of England, where it was exhibited, was awarded a certificate of merit.

It is a large, massive flower with high-pointed centre, with nicely reflexing petals of great substance. The long buds, in first developing, are a light lemon-yellow, while the flowers in their half-expanded form reveal a heart of golden-apricot; it has a delicious Rose-apple scent. Strong two-year-old plants, \$2.00 each.

John Russell. Another Gold Medal variety raised by Dobbie & Company, of Scotland, with which we have been greatly pleased; a strong, vigorous, upright grower, somewhat resembling H. V. Machin in this respect, but decidedly freer flowering. Its flowers are large, very full and double, of perfect form, and of a rich, brilliant shade of deep velvety-crimson. Strong two-year-old plants, \$2.50 each.

J. Otto Thilow. This variety of outstanding merit originated with Messrs. Verschuren & Sons, and has been named in memory of our late Mr. Thilow. Buds long and pointed, of graceful shape; as the flowers expand the petals reflex, forming a full double flower of good form and large size, of a glowing, rich rose-pink. Plant a strong, vigorous grower and very free-flowering; a grand garden Rose and a splendid cut flower. \$2.00 each.

Hybrid-Tea Rose, Mrs. Henry Bowles

Lady Margaret Stewart. One of Alexander Dickson & Sons' latest Irish introductions, which was awarded the Gold Medal of the National Rose Society of England at the 1926 spring show. A Rose of unique and distinct color; the flowers in the young stage are a deep sunflower yellow heavily veined and splashed with orange-scarlet, with the reverse of the petals deeply suffused with carmine; as the flowers develop, these colors intermingle, forming a most beautiful cadmium orange effect. The bud is long and pointed, opening to a full double flower of most pleasing decorative form, of delightfully sweet scent. Growth very vigorous and upright, with beautiful, glossy, deep green, serrated foliage. \$3.00 each.

Mary Pickford. A Howard & Smith production named in honor of America's own favorite artist. A novel Rose of merit. In habit of growth it is strong, vigorous, not unlike Souvenir de Claudius Pernet, which was one of its seed parents. Color, an exquisite shade of orange-yellow, stained on the reverse of the outer petals with salmon and salmon-blush. The flowers are deliciously tea-scented and produced freely. \$1.50 each.

Mrs. Erskine Pembroke Thom. Another Howard & Smith novelty, a beautiful yellow Rose which, however, is entirely distinct; a clear, deep, canary-yellow, without any trace of shading and which will prove a desirable addition to our list of yellow Roses. Of strong, upright, branching habit and free-flowering. \$1.50 each.

Mrs. Henry Bowles. Nearly everybody has admired the old-time Mme. Abel Chatenay, for a long time one of the most popular Roses but which has practically disappeared from commerce. In Mrs. Henry Bowles we have the same pleasing, warm color values but in flowers of much greater size. Color, a most effective deep salmon-pink, and of splendid form. Vigorous growing and free-flowering. \$1.25 each.

New Hybrid-Tea Rose, Roselandia

The Dreer Special Collection of McGredy Irish Hybrid-Tea Roses

Introductions of Messrs. McGredy & Son, Portadown, Ireland. By special arrangement which we have made with the introducers these seven choice novelties will be distributed exclusively by us, only in the United States and Canada this season, they will not be offered in European countries until later.

Irish Charm. This is a gem of exquisite form and absolutely distinct from any variety yet introduced, it is of strong branching habit, remarkably free-flowering. The buds and flowers are of medium size, the base of the petals a rich golden-apricot passing to a delicate blush-pink as the flowers develop. \$1.50 each.

Irish Charity. Fair-sized flowers with fine buds of a most intense fiery scarlet with golden sheen opening to moderately double blooms of an attractive and distinct rosy-scarlet. Strong branching habit and very free. \$1.50 each.

Irish Courage. A splendid addition to the list of bi-colored Roses, the color being a soft shrimp-pink merging to salmon in the fully expanded petals, the whole overlaying a golden orange ground, this color being very pronounced at the centre of the flower. Growth and fragrance moderate with attractive dark glossy-green foliage. \$2.00 each.

Irish Hope. A splendid and distinct red with well-formed buds composed of heavy, broad petals opening to moderately full, very fragrant flowers. The color is a rich rosy-crimson with maroon shadings. It is of splendid vigorous growth with good foliage and a free and continuous bloomer. In our trial plots this looks like one of the most promising varieties, among the many red sorts on trial. \$1.50 each.

Irish Morn. Magnificent long-pointed buds with heavy shell-like petals, color imperial pink deepening to a coral centre with golden lustre and sheen. Plant of strong growth but moderate height, very free-flowering and sweetly scented. \$1.50 each.

Irish Sweetness. A delightfully fragrant variety and splendid addition to the none-too-long list of good red bedding Roses. Color, an exquisite shade of crimson-lake suffused with scarlet; a vigorous free grower and very free-flowering. \$1.50 each.

Mrs. W. E. Nickerson. An extremely vigorous growing very free-flowering grand new Rose of the duatone Pernetiana type. The splendidly-formed buds are of an entrancing new color, the exterior of the petals heavily veined with rose d'or and shaded orange-cadmium, the interior a deep chrome-yellow on the lower half vein out and pass to a warm rich rosy-salmon. Valuable as a garden variety, will also prove most valuable for interior decoration, particularly so as the intensity of coloring is especially effective under artificial light. \$2.00 each.

New Hybrid Tea Roses

Introductions from Various Specialists—Continued

Mrs. Lovell Swisher. One of Howard & Smith's California Roses which we offered for the first time last year and which after another season's observation we are convinced is one of the American-raised Roses which has come to stay and which as a garden Rose will undoubtedly rank with such popular bedding varieties, as Radiance, Red Radiance, Lady Ursula, Mrs. William C. Egan, etc.

It is a remarkably vigorous grower of branching habit, well furnished with excellent foliage, freely producing perfectly formed, long, shapely buds with nicely reflexing petals that develop into good double flowers which in all stages of development remind one of the variety Mrs. William C. Egan. The color of the buds is a deep coppery-salmon at base, merging to salmon-pink at the tips. The developed flowers are also salmon-pink deepening towards the centre. Delightfully tea scented. \$1.50 each.

Pink Pearl. A dainty new variety from Holland, destined to become a universal favorite if it had nothing to recommend it but its delicious fragrance; it is the sweetest scented Rose we know. In color it is a brilliant, rich cerise-pink with the base of the petals touched with luminous, glowing gold that lights up the flower wonderfully, particularly in the half-expanded bloom. The flowers are of medium size, full double, of perfect form, and produced most profusely on plants of vigorous, healthy growth. \$1.50 each.

Roselandia. We distributed this variety last year only in young plants to the growers of winter cut flowers under glass, and as a result of its pleasing color and free habit of flowering it is rapidly finding its place as one of the standard cut flower sorts and we have every reason to believe that it will prove equally desirable for garden purposes. With this in view we have prepared a stock of two-year-old plants which we now offer.

Roselandia is a sport from the popular variety Golden Ophelia, over which it is an improvement not only in color but in its remarkable free-flowering habit. It is a golden-orange suffused with a lustrous glow of apricot in the heart and at the base of the petals, frequently tinted red on the reverse of the outer petals; the buds are long pointed, of superb build and substance, and very sweet scented. Strong two-year-old plants, \$1.50 each.

Hybrid-Tea Rose, Mrs. W. E. Nickerson

New Irish Hybrid Tea Roses

The varieties described below are the more recent introductions of Messrs. Samuel McGredy and Son, of Portadown, Ireland. The varieties marked 1925 and 1926 are introductions of the past two years and are offered exclusively by us this season in the United States and Canada.

The Messrs. McGredy are the originators of many of the prominent popular Roses grown in our gardens at this time.

Doris Traylor (1924). Buds of splendid form, long and pointed, opening to moderately full flowers, sweetly scented. Color, imperial pink flushed crimson and orange; the coloring is intensified by the golden base of the petals, which gives the flowers a golden suffusion which is difficult to convey. Growth vigorous and very free-flowering. **\$1.25** each.

Lord Charlemont (1922). Although introduced some four years since, this beautiful variety is still very scarce. It is the most gorgeous and brilliant Rose we have, with flowers of the most intense clear crimson-scarlet deepening to carmine-crimson, with almost black shadings, with perfectly shaped, long pointed buds and large, full double, sweetly scented flowers. Free growing and free flowering. A splendid Rose of exceptional richness and beauty and which attracted more attention in our trial beds in the summer of 1926 than any other one variety. Unfortunately it is subject to black spot in unfavorable seasons, but in spite of this it should be included in every collection. **\$2.00** each.

Mrs. A. R. Barraclough (1926). Unquestionably one of the finest Roses Messrs. McGredy have ever sent out, and winner of a Gold Medal of the National Rose Society of England.

Pink sounds uninteresting in a new Rose, there being so many of this shade, but in this new variety we have a most distinct and valuable addition of a bright but soft sparkling carmine-pink of an even shade, passing to yellow at the base of the petals. The color does not fade as the flower ages, but appears to become brighter. The flowers are full double, of great size and substance and of perfect form, with petals that are beautifully reflexed and of good texture. The plant is of free branching habit, strong, vigorous and free-flowering; very fragrant. **\$2.00** each.

Mrs. C. W. Edwards (1924). Rich rosy-scarlet overlying an orange ground, the base of the petals prettily zoned citron-yellow which runs in faint veinings into the higher colors; a novel color combination. Strong, vigorous habit of growth; very free-flowering, with large, full, fragrant flowers. **\$1.25** each.

Mrs. Talbot O'Farrell (1926). A pretty shaped, medium-sized bud, and flowers of moderate petalage. The outside of the petals lemon-yellow flushed and splashed deep cerise to crimson; the inside is deep cerise heavily flushed and veined orange-yellow and bronze, all the colors blending and mingling in pretty combination. A moderate grower; sweet scented. **\$2.00** each.

Hybrid-tea Rose, Norman Lambert

Norman Lambert (1926). The formation and size of the flowers reminds one of Golden Emblem but with a distinct color combination that is novel. The outside of the petals is a deep chrome-yellow with a marginal color effect of brilliant orange-scarlet merging to an irregular zone of burnt orange, the inside salmon-orange suffused bronze, shading to yellow at the base. The flowers are of medium size and form with petals of good texture, delightfully fragrant and exceptionally free-flowering. **\$1.50** each.

Sir David Davis (1926). Color, an unfading deep glowing crimson of an even shade throughout running to light yellow at the base of the petals. The flowers are of good size, pointed and of good form with large, heavy petals, exceptionally free-flowering and strongly sweet scented. **\$1.25** each.

Victor Waddilove (1925). Beautiful long buds of a rich brilliant salmon-orange with intense carmine suffusion, large double flowers of splendid form; a strong but compact grower, exceptionally free-flowering and delightfully scented. **\$1.50** each.

Meritorious Roses of Recent Introduction

Aspirant Marcel Rouyer. A Rose that is admired by everyone with long shapely bud that develops into a good-sized substantial double flower with heavy shell-like petals. Color, deep apricot, tinted red at centre reverse of petals shaded salmon-flesh with deep yellow veinings at the base. A vigorous but compact grower and free and continuous bloomer. **\$75.00** per 100.

Betty Uprichard. A variety that is likely to become a favorite garden Rose. The color is a charming salmon-pink shaded orange-cerise, very distinct. The buds are of good form and develop into deliciously scented perfect blooms; free and vigorous in growth and flowering. **\$75.00** per 100.

Edel. An enormous bold, stately well-built flower of great depth, quality and finish. Color, white with the faintest ivory shading towards the base, passing to a pure white. A fine grower with uniform, stout habit. Very free-flowering, opening well in all weather, delightfully scented. Considered the finest white Rose yet introduced. **\$60.00** per 100.

Elsie Beckwith. Beautifully-shaped buds opening to high-centered full double flowers of a rich, deep, glowing rose-pink and sweetly scented. An upright strong grower and very free. **\$100.00** per 100.

E. P. H. Kingma. A "sport" from the popular Daily Mail Rose, Mme. Edouard Herriot, in color a wonderful rich glowing deep orange-shaded apricot, the flowers are semi-double, beautiful in bud form, it flowers profusely and continuously. **\$75.00** per 100.

Etoile de Feu. Very distinct and attractive large substantial globular buds expanding to large, cupped, full-to-centre flowers, of a rich flaming orange-pink with flame-colored shadings, borne profusely throughout the season, the plant is of vigorous free habit with attractive glossy foliage. **\$75.00** per 100.

Imperial Potentate. Introduced only two years this beautiful variety is quickly finding its place among the most popular garden sorts. Its splendidly-shaped buds develop into large, sweet scented double flowers of crisp, glistening rose-pink with silvery suffusion at the base of the petals. **\$100.00** per 100.

Independence Day. An entirely distinct and novel color that at once arrests attention, a rich orange-apricot suffused with sunflower-yellow. The buds are long, very freely produced and delightfully fragrant. One of the most beautifully colored Roses of its type. **\$60.00** per 100.

Mme. Alexander Dreux. While not a large flower it has become prominent as a winter cut flower on account of its distinct brilliant color and pretty shaped buds of a brilliant coppery golden-yellow and which develop into high centred full flowers with reflexed petals of deep yellow splashed with orange. It has also proven desirable as a garden rose of vigorous, compact free-flowering habit. **\$125.00** per 100.

Meritorious Roses of Recent Introduction—Continued

Hybrid-Tea Rose, Souv. de Georges Pernet

Mme. Poincare. A most desirable garden variety which on account of its healthy vigorous growth and free-flowering habit is certain to become popular. Its buds are long and shapely, the attractive flowers are of cupped form and full double. Color, a pretty salmon-pink deepening to an apricot centre. **\$60.00 per 100.**

Mrs. William C. Egan. An extremely vigorous, strong, healthy grower, with long, pointed buds of absolutely perfect form, that develops into flowers of good shape. In color it is a two-tone pink, the reverse of the petals a soft light pink, the interior deep flesh color with a golden line at the base of the petals; the flowers are carried on long, stiff stems, and last in good condition for an unusually long time, either cut or on the plant; an exceptionally free and continuous bloomer. **\$100.00 per 100.**

Padre. One of the finest bedding Roses of recent introduction. A brilliant coppery-red flushed with yellow at the base, a color combination that appeals to everyone. It is of vigorous habit of growth and will produce more flowers than any other variety of the Hybrid-Tea class. The beautiful long buds are borne on long, stiff stems and are splendid for cutting as well as for garden decoration. **\$100.00 per 100.**

Rev. F. Page Roberts. A Rose of remarkable beauty both in form and color. The long pointed buds are of a coppery-red stained red on the outside, and open to good full double fragrant flowers of a golden-yellow, particularly high colored in late summer and fall. The plant is of vigorous branching habit with beautiful foliage. A most distinct variety that deservedly has gained great popularity in the short period since its introduction. **\$200.00 per 100.**

Sensation. We hesitated to endorse this large red heretofore as we had seen it only under weather conditions which caused the color to purple, but during the past wet, cloudy season it proved to be one of the very desirable varieties. The flowers under these conditions were very large, of full double excellent form, and of a splendid scarlet-crimson color shading much deeper in the autumn. A strong, vigorous grower and very free-flowering. **\$75.00 per 100.**

Shot Silk. One of the most beautiful of Alex. Dickson & Son's introductions of 1924, which was awarded the Gold Medal of the National Rose Society of England. Color orange-rose, overshot with golden-yellow and flushed soft rose; bud of beautiful shape, the open flowers cupped with reflexing outer petals; growth vigorous and free, with beautiful foliage; a sweetly scented Rose of exceptional merit. **\$100.00 per 100.**

Souvenir de Claudius Pernet. A most vigorous grower of erect branching habit; beautiful, brilliant green foliage; long pointed buds of exquisite shape, carried on long, stiff stems. Very large, full flowers with elongated deep petals, a beautifully formed bloom. Color most striking sunflower-yellow, deeper in the centre, without any color blending, and which is retained without fading even in the warmest weather. No other Rose ever introduced has attracted so much attention. **\$75.00 per 100.**

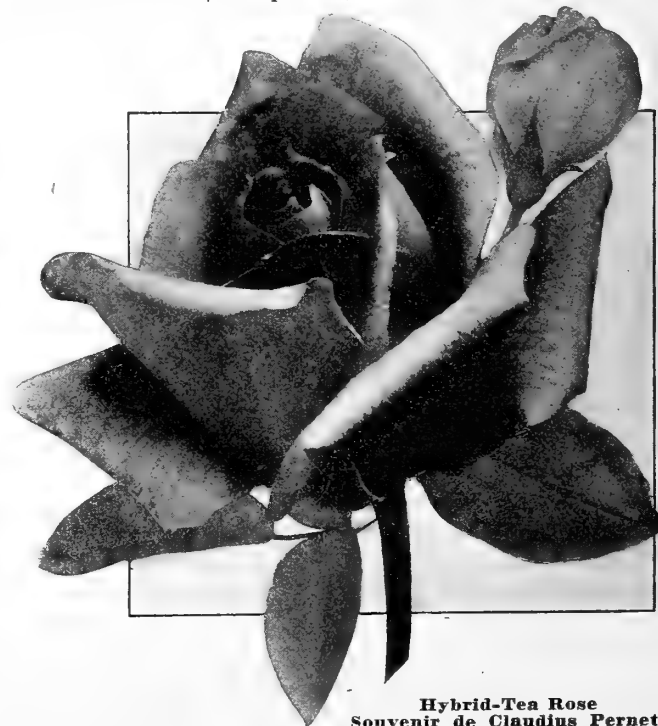

Souvenir de George Beckwith. A variety that is meeting with much favor; flowers very large, globular and full double, with petals of good substance. Color shrimp pink, tinted chrome-yellow, shading deeper at the base of the petals, the various shades blending very harmoniously; moderately fragrant. **\$60.00 per 100.**

Souvenir de Georges Pernet. We have felt enthusiastic about this variety ever since its introduction, and are convinced that it stands at the head of the list of the many valuable garden Roses that have been produced by Mr. Pernet-Ducher. It is a strong, vigorous grower and produces its large flowers which are beautiful in both bud and fully developed bloom, which are of an intense Oriental red, shading to cochineal carmine at the margin of the petals, the whole being suffused with a golden sheen. **\$60.00 per 100.**

Souvenir de H. A. Verschuren. This Holland introduction of 1924 has, as we anticipated when we first offered it two years since, quickly found its place among the best bedding Roses. In color it is a two-tone yellow, the centre a beautiful apricot-yellow which shades to saffron-yellow at the edges, and while in unfavorable weather it shades lighter, its rich color is maintained better throughout the season than any other pure Hybrid-Tea variety of similar color. **\$60.00 per 100.**

Sunstar. Has less petalage than desirable but is nevertheless one of the most distinct and attractive varieties in bud form. The buds are exceptionally long and of most desirable form, in color lemon-yellow, edged, splashed and veined with crimson and vermillion in a wonderful medley. The coloring is so unique and pleasing that even if we could only have a few of these beautiful buds in the season we should not wish to be without this novel colored variety. **\$100.00 per 100.**

The Queen Alexandra. A brilliant flower of intense vermillion, deeply shaded old-gold on reverse of petals, which spring from a pure orange base; one of the most remarkable color combinations seen in Roses. The flowers are quite full and when half-blown are bewildering in their beauty, delightfully sweet scented. **\$60.00 per 100.**

New Hybrid-Perpetual Rose

Mme. Albert Barbier

(Barbier Bros., 1925)

A noteworthy novelty which we offered for the first time last season in a limited way only, and from which we have had most gratifying reports of results obtained during the past season.

It has been some years since we had the pleasure of offering a Rose in this class. In fact, the hybridizers of the Rose world seem to have devoted their energies entirely to other types, particularly to Hybrid-Tea and Pernetiana hybrids, and when the originators sent us this variety for trial we did not realize what a pleasant surprise was in store for us.

The seed parent of this beautiful Rose is that international favorite “Frau Karl Druschki,” possessing the same vigor and sturdiness but of more dwarf, more compact habit, naturally forming a vigorous, shapely bush, of free-flowering qualities, it surpassing in this respect all other Hybrid Perpetual Roses, it being a perpetual bloomer. Yes, in this respect equaling and even surpassing many of the popular Hybrid-Tea varieties.

The large flowers are of beautiful imbricated form, with perfect buds, developing into well-formed, full, double flowers of a pearly-white, suffused with a soft flesh-pink, intensified and illuminated by the golden-apricot centre and base of the petals. **\$100.00 per 100.**

Rosa Hugonis

This species, recently introduced from China, is unlike any other Rose. It is of shrub-like habit of growth and naturally forms symmetrical bushes about 6 feet high and the same in diameter.

Its delicate yellow, single flowers are produced on long arching sprays early in May, every branch of the previous season's growth becomes lined on both sides to the very tips with these attractive flowers, and after it has finished flowering it remains an attractive decorative bush for the balance of the season; perfectly hardy. Strong two-year-old plants, **75 cts. each.**

Two Single Flowering Gems Either for Bedding or for Easter Forcing

We do not know the parentage of these two varieties. They have been introduced as Polyanthas, but are entirely distinct from this type. Both are strong, vigorous growers and profuse bloomers; the flowers are almost single but are held on the plants as persistently as on any of the best of the double flowering Polyantha type. The flowers are of good size, nearly 2 inches in diameter. Aside of being profuse and continuous flowering for bedding purposes, they will also undoubtedly prove popular for Easter forcing as pot plants, being different from anything now grown.

Else Poulsen. An attractive, clear rose-pink.

Kirsten Poulsen. Splendid bright scarlet.

Strong two-year-old plants, \$1.50 each. Stock limited.

Perpetual-flowering Bedding Roses

Gruss an Aachen. A very distinct type of Polyantha Rose with exceptionally large flowers for this class of Rose, always a mass of bloom through the season. Color, flesh-pink with salmon and yellow shadings. \$60.00 per 100.

Gruss an Teplitz. The well-known popular scarlet with deep crimson shading, not a large flower but there is no better bedding Rose, it succeeds everywhere. \$50.00 per 100.

Hermosa. The old favorite pink Bourbon Rose. A splendid bedding Rose. \$50.00 per 100

Emily Gray. In this we have a real yellow climbing Rose. The buds are long and pointed, of splendid shape; in color, a beautiful light orange-yellow, changing to pale orange as they expand; they are borne on stiff stems of sufficient length for cutting; dark green, glossy, holly-like foliage. 75 cts. each.

Ernestine Cosme. A unique single-flowered variety of pretty form and of a delicate soft pink, these are borne in great pyramidal shaped many flowered sprays in great profusion. 75 cts. each.

Phyllis Bide. The feature of this variety is that it blooms continuously throughout the summer and fall, and while its flowers are small they are of exquisite form in the bud opening with gracefully reflexed petals and are produced in long, loose sprays; in color a pale gold at base, flushed and shaded pretty rosy-carmine towards the edges. Awarded a Gold Medal at the National Rose Societies Show at Glasgow, Scotland in 1924. \$1.00 each.

Solarium. In single-flowered Ramblers this is a gem. It is of the same type as Hiawatha on which it is a decided improvement, the flowers being larger, more freely produced and of more brilliant coloring, an intensely rich crimson-scarlet. 75 cts. each.

New Gaillardia, Portola

A most valuable perennial. The plant is of strong, vigorous, upright habit of growth, 2½ to 3 feet high; the long flower stems, straight and strong, hold the massive flowers erect. These are of extraordinary size, from 3½ to 4 inches in diameter; the petals very broad, overlapping, of great substance, and spread out flat, forming a very symmetrical flower. In color, a brilliant, rich coppery-scarlet, each petal heavily tipped or margined with golden yellow—altogether a wonderful improvement over existing sorts, and valuable alike as a flower for the garden and for cutting.

Good young plants from 2¼-inch pots that will bloom freely this season, ready April 1st. \$3.50 per doz.; \$25.00 per 100.

NEW DOUBLE FLOWERING ORIENTAL POPPY "OLYMPIA"

While double and semi-double forms of the Oriental Poppy are mentioned in some of the horticultural text-books, we have never seen such until our attention was called to the variety here offered.

The plant is of strong, vigorous habit, but of compact growth not exceeding 2½ feet in height and produces its flowers profusely; these when fully developed are about 4 inches in diameter; when first opening full double, but show a slight centre with a bunch of stamens as they mature. In color it is a brilliant rich flame scarlet overlaid with an iridescent glistening golden salmon; a brilliant golden sunset, one of our artist friends called the color. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

(*Berberis Thunbergi Atropurpurea*)

It is only once in a lifetime that a really worth while outstanding novelty in hardy shrubs is introduced and in this new Barberry we have such a plant.

It is similar in all respects to the green-leaved Japanese Barberry which is so popular for foundation plantings and for hedges, but the foliage of this new variety is of rich, lustrous, bronzy red and in the fall changes to vivid orange, scarlet and red shades.

In order to develop its brilliant coloring at all seasons it must be planted in full exposure to the sun.

Wheel Hoes, Cultivators and Seeders

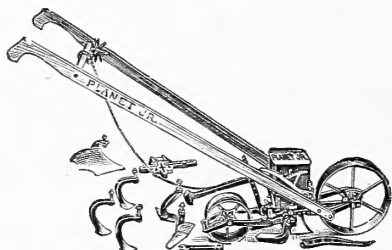

Much of the tedious, back-breaking seeding, weeding and hoeing are eliminated by the use of adjustable wheel tools. Being light and simple in construction, they are practical tools for women and children. Market gardeners use them, making possible accurate sowing and thorough cultivation in rows too narrow for horse tools.

Send for a Planet Jr. Catalogue. It is possible to list only a few of these tools here since the line includes a very complete assortment of hand tools and horse tools, both for one horse and two horses.

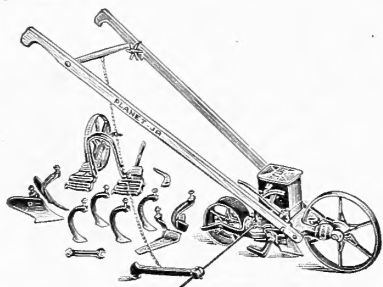

No. 3 Planet Jr. Hill and Drill Seeder

A popular size at a moderate price. The size used by growers excepting the very largest market gardeners. \$17.50.

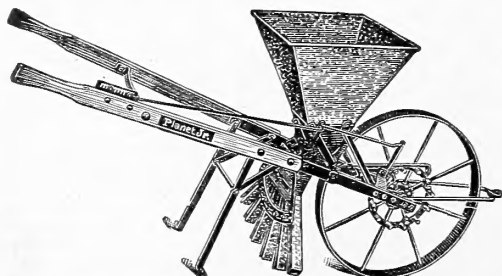

No. 4 Planet Jr. Combined Hill and Drill Seeder and Single Wheel Hoe

The small grower should select one of the combined machines. The drill attachment will not be used as often as the hoeing and cultivating tools, but will be a source of much saving. As a Hill and Drill Seeder it opens the furrow, deposits the seed, covers it and rolls it, either in drills or hills. Holds $2\frac{1}{2}$ quarts. \$18.00.

No. 25 Planet Jr. Combined Hill and Drill Seeder and Double Wheel Hoe

Many users call this the "Complete Gardener." Sows all seeds as explained under No. 4. Used as a double wheel hoe, it straddles the row, cultivating both sides at one time till plants are 20 inches high. It can then be used as a single wheel hoe between the rows. The equipment of one pair of garden plows, 4 cultivator teeth, 1 pair of 6-inch hoes and leaf lifters enables you to do practically all the garden work. Capacity of seed hopper, $2\frac{1}{2}$ quarts. \$21.50.

No. 220 Planet Jr. Fertilizer Distributor

With this machine you will save fertilizer, time and labor, and produce bigger crops. Will distribute 100 to 2000 pounds of commercial fertilizer to the acre. Hopper capacity, one bushel. Price, \$27.00.

No. 16 Planet Jr. Single Wheel Hoe

Designed to do all work required in the small garden. Plowing, cultivating, hoeing and raking. It is very light, and can therefore be easily carried about. \$9.00

No. 17 Single Wheel Hoe. Identical with No. 16, excepting that the two rakes and leaf guard are not supplied. 7 75

No. 17½ Single Wheel Hoe. Same less plow. 6 75

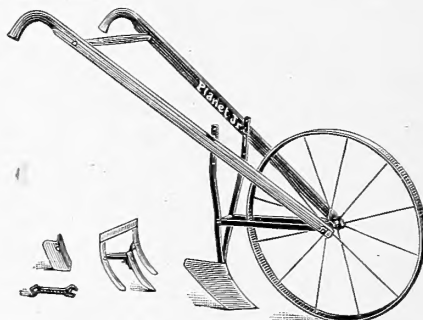

No. 18 Single Wheel Hoe. 6 inch hoes only. 5 75

No. 33 Planet Jr. Garden Plow and Cultivator.

Equipment: One garden plow, one 10-inch sweep, one cultivator tooth, one 5-prong cultivating attachment, 15-inch steel wheel.

A valuable tool for the large or small grower of vegetables. The complete assortment of cultivating attachments enables you to do the garden plowing, open and close furrows for seeds, hill up plants, do thorough cultivation and kill weeds, saving both time and labor. \$6.00.

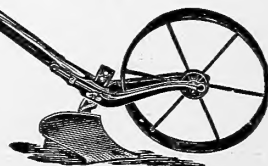

No. 119 Planet Jr. Garden Plow and Cultivator

Equipment: One garden plow, one 4-inch cultivating tooth, one 2-inch cultivator tooth, one scuffle blade cultivating attachment.

For choice of those who prefer a high wheel tool. Don't confuse it with cheaper makes or the likes of design. Complete assortment of cultivating attachments takes care of plowing, hilling, opening furrows and general cultivation. \$4.75.
